EDUCATION

Available for internship: 25 Jan – 9 Jul 2027 (24 weeks)

University of Malaya (Expected graduation: July 2027) — **Oct 2023 – Present**
Bachelor of Computer Science (Information System) — CGPA 3.87/4.00

Kolej Matrikulasi Perak — **Jul 2022 – Jun 2023**
Pure Science — CGPA 4.00/4.00

SMJK Krian — **Jan 2017 – Dec 2021**
SPM - 8A (6A+, 2A)

TECHNICAL SKILLS

- Programming Languages: Java, Python, JavaScript, TypeScript, SQL
- Frontend: React, HTML, CSS
- Backend & Databases: FastAPI, Flask, Node.js/Express, REST API, PostgreSQL (Supabase), MongoDB
- AI / LLM: Gemini API, RAG, embeddings, pgvector
- Tools: Git, GitHub, Docker, Postman, Figma, Render, Vercel

PROJECTS

QSolva – AI-Assisted IT Service Desk | Aug – Sept 2026
React, TypeScript, FastAPI, PostgreSQL, Supabase (Auth, Storage), pgvector, Gemini, Docker

- Built and deployed a full-stack IT service desk to replace fragmented IT support, with ticket escalation, notifications, and business-hours-aware SLA tracking.
- Built a RAG pipeline that retrieves similar resolved tickets to generate troubleshooting steps from ticket text and screenshots, with AI priority triage (confidence score, admin override) and a knowledge loop that drafts Help Center articles from recurring issues.

VeriGate – AI Governance & Shadow AI Prevention Platform (Hack-Attack 3.0 Hackathon) | Jul 2026
React, TypeScript, FastAPI, PostgreSQL (Supabase), Chrome Extension, Gemini

- Built a Chrome extension and policy gateway that blocks unapproved AI tools and routes approved usage through enforcement, to reduce shadow-AI data leaks.
- Developed a detection engine combining rule-based matching with LLM intent classification to sanitize, hold, or block prompts and files containing PII, financial, or credential data, with audit logging, trust scoring, and a Governance Copilot.

EduPath – Transcript Parsing & Predictive Analytics (Final Year Project) | In-progress
Python, Flask, PostgreSQL (Supabase), PyMuPDF, Gemini

- Automated transcript entry for UM students with a pipeline that extracts semester, course, grade, and credit data, with human verification of the results.
- Built CGPA projection, what-if simulation, and AI career matching using cosine similarity against O*NET occupation profiles, and an anonymised staff dashboard.

ChillPick – Movie Recommendation System | Mar – Jun 2025
Node.js, Express, MongoDB, EJS

- Built a recommendation platform personalised by search history, ratings, and reviews, using TMDB and Google Books APIs.
- Solved the cold-start problem with an onboarding taste quiz and genre-based fallback recommendations.

ACTIVITIES

- **Exchange Student, Chonnam National University, South Korea | Sept – Dec 2025**
  - Completed robotics coursework and built an autonomous self-driving car prototype.
- **Program & Protocol Member, UM Tech Night 2025 | Apr – Jun 2025**
  - Planned the programme flow and event logistics.

SPOKEN LANGUAGES: Mandarin (Native), English (MUET Band 4), Malay (Conversational)
